# WELCOME

## Welcome to the Second Annual NYC Health + Hospitals Simulation Symposium.

The theme of this year's symposium is *Inspiring Growth: Leading Trends in Simulation & Debriefing*. The symposium is designed for new and experienced healthcare practitioners, administrators, educators and researchers.

The second annual NYC Health + Hospitals Simulation symposium will provide an innovative showcase of global trends in healthcare simulation, and demonstrate how the right leadership, teamed with effective simulation and debriefing, can improve safety, quality, cost effectiveness, and efficiency in healthcare. Experts from all healthcare disciplines will inspire attendees to reimagine current practice through the use of simulation strategies.

The growth of the devolved model of Simulation Education at the NYC Health + Hospitals Simulation Center is due to the tremendous support of NYC Health + Hospital Leadership's visionary guidance and support. We currently have satellite centers active at Elmhurst, Harlem, Lincoln, and our newest satellite being Correctional Health.

Today we will honor the wonderful achievements of selected individuals and teams at NYC Health + Hospitals and their unique leadership of simulation activities throughout the healthcare system. We have eight Healthcare Simulation Commendation Awards.

These include:

### **Ricardo Perez**

Leading regular simulation and debriefing sessions for Behavioral Health Teams at NYC Health + Hospitals/Lincoln.

### **Andrew Restivo**

Leading Emergency Medicine Grand Rounds each month as well as bi weekly small group simulation sessions for the past four years at the Simulation Center hub at NYC Health + Hospitals/Jacobi.

### **Nehad Shabarek**

Leading the Lincoln Simulation Center Simulation Week 2017 Fair & bi-weekly mock code practice, particularly in departments where codes are rare at NYC Health + Hospitals/Lincoln.

### **Sheila Robinson and the NYC Health + Hospitals/Queens C-Suite Team**

NYC Health + Hospitals/Queens C-Suite for being the first Leadership Executives to participate as a team in the "Introduction to Debriefing" course.

### **Rohan Reid and the NYC Health + Hospitals/Queens Behavioral Health Team**

The Behavioral Health department at NYC Health + Hospitals/Queens where the most staff were trained in the first month of the health system debriefing for Behavioral Health Teams Performance Improvement project.

### **Srinivas Reddy & Edward Chao and the NYC Health + Hospitals/Jacobi Trauma Team**

Incorporating bi-weekly simulation sessions focusing on trauma resuscitation into the surgical residency program at NYC Health + Hospitals/Jacobi.

### **Suzanne Bentley and Lorraine Boehm & the NYC Health + Hospitals/Elmhurst Simulation Team**

The establishment of the Elmhurst satellite Simulation Center at NYC Health + Hospitals/Elmhurst where courses are delivered on a daily basis, both core courses from the simulation hub at Jacobi and courses developed locally to meet the needs of Elmhurst Healthcare Teams.

### **Komal Bajaj and Michael Meguerdichian**

Created the PEARLS Healthcare Debriefing Tool cognitive aid which was published in *Academic Medicine*, the premier journal in Healthcare education.

We are privileged this year with two distinguished keynote speakers:

**Dr Christine Park** is a Clinical Professor in anesthesiology and Co-Director of the Clinical Performance Center, University of Illinois, Chicago, as well as the Immediate Past President, Society for Simulation in Healthcare. Christine has a wealth of knowledge of Healthcare Simulation and different leadership perspectives and we look forward to her sharing with us this morning.

**Dr Jillann Farmer** comes to us from the United Nations as Director of Medical Services there. Jillann leads the global healthcare teams which the United Nations deploys around the world. Jillann will be speaking with us about her journey as a leader of medical services in the United Nations.

We encourage you to relax and enjoy the day.

There will be plenty of “hands on” simulation activity at the sim fair which is co-located in the simulation center. Try your hand at intubation, birthing a baby, inserting a central line and the many varied simulation experiences our team has in store for you!

There is also a Simulation in Healthcare Fellowship booth where you can speak with current and past fellows about their simulation fellowship experience.

Thanks for sharing Simulation Symposium 2.0 with us. Remember that simulation is just a technique, however, teamed with the right leadership and desire to improve, this technique can transform healthcare culture.
